About Me

As a self-taught developer, I find joy in crafting digital wonders from the depths of my imagination, relishing the art of problem-solving, and ever-in pursuit of ingenious routes to deliver solutions.

I've crafted hundreds of websites and services for clients in Finland and globally, built my own sports and eCommerce platforms, and implemented various REST APIs using Node and PHP.

Also very crafty with frontend frameworks like React, Vue, and SvelteKit.

Professional Experience

Tuspe Design Oy | CEO, Full-stack Developer 2016 – Present

Entrepreneur with experience in developing full-stack applications, integrating payment and sports services, managing a SaaS sports platform, and maintaining servers for clients. Also built automated backup and data fetch services.

Koivu Solutions Oy | Frontend Developer 04/2024 – 08/2024

Developed new features for an application that manages shifts and work hours for healthcare workers. Also utilized several custom ChatGPT bots.

Vertics Oy | Full-stack Developer 06/2023 – 01/2024

Developed a REST API between Posti Glue and an online store, and further developed the backend and frontend of the shift and time tracking system for the rescue services.

Quux Oy | React and WordPress Developer 03/2022 – 04/2023

Developed, optimized and solved problems for WordPress websites and online stores, as well as develop React webapps.

Ratsukko Solutions Oy | Full-stack Developer 09/2020 – 03/2023

Developed a reservation calendar platform for the riding industry, allowing easy management of classes, reservations, invoicing, and more. Founding member.
